

Follow these steps as shown in the example below:

1. Read the question and look at the "sandwich".
2. Color in the missing rod and write its number to complete the "sandwich".
3. Read the question again and fill in the missing numbers to complete the equation.

What do you have to add to 4 to make 7?

$$4 + \underline{\quad} = \underline{\quad}$$

What do you have to add to 7 to make 9?

$$7 + \underline{\quad} = \underline{\quad}$$

What do you have to add to 2 to make 6?

$$2 + \underline{\quad} = \underline{\quad}$$

What do you have to add to 5 to make 8?

$$5 + \underline{\quad} = \underline{\quad}$$

What do you have to add to 6 to make 10?

$$6 + \underline{\quad} = \underline{\quad}$$

What do you have to add to
7 to make 9?

$$7 + \underline{\quad} = \underline{\quad}$$

What do you have to add to
1 to make 6?

$$1 + \underline{\quad} = \underline{\quad}$$

What do you have to add to
3 to make 10?

$$3 + \underline{\quad} = \underline{\quad}$$

What do you have to add to
4 to make 8?

$$4 + \underline{\quad} = \underline{\quad}$$

What do you have to add to
5 to make 9?

$$5 + \underline{\quad} = \underline{\quad}$$

What do you have to add to
2 to make 7?

$$2 + \underline{\quad} = \underline{\quad}$$

What do you have to add to
7 to make 8?

$$7 + \underline{\quad} = \underline{\quad}$$

What do you have to add to
8 to make 10?

$$8 + \underline{\quad} = \underline{\quad}$$
